

# Accessory Checklist

For the installation of Fullback®V Siding Insulation for Vinyl Siding

## J-channels

### J-Channel

In order for the J-channel to properly receive the thickness of both the vinyl and the insulation, a 1-1/8" j-channel is required for Fullback®V, and a 1-1/4" j-channel is required for Fullback®V 125.

### EasyShim™

In the event that the proper size j-channel is not available, then we suggest the use of EasyShim™. It is a helpful accessory which enables you to use a 5/8" or 3/4" j-channel, and still get a proper installation.

## Starters

### EasyStart™

This vinyl universal starter strip ensures you have a level job and begin installation correctly without fabricating a starter strip. Features 3" nailing hem, two rows of nail slots and reinforcing ribs.

### Starter Adaptor

This starter adaptor has been exclusively designed for use with Fullback®V siding insulation. Starter Adaptor must be ordered for the specific profile of Fullback®V with which it will be applied.

## Corner Posts

### EasyPost™ Plus

Remodeling corner post insulation makes square corners a snap, cutting your corner post installation time in half. Necessary for installations using vinyl corner posts with a receiving pocket of 7/8" or less.

### Inside EasyPost™ ("V" Cap)

An all-in-one, custom-cut shim for spacing out and supporting inside corner posts with a receiving pocket of 7/8" or less.

### New Construction EasyPost™

New construction corner post insulation for use with vinyl corner posts with a siding receiving pocket of 1-1/8" to 1-1/2".

## Window Surround

### Window Surround

3.5" and 5" Lineal Window Support Surrounds give window casing the solid look and feel of real wood. Provides a strong, supported and rigid casing surround. Eliminates open or loose mitre cuts at corners and tightens laps.

Custom cut to work with window lineals from: Alside, Certainteed, Crane, Gentek, Heartland, Mastic and Norandex.

## Other

### EasyCut Knife

Although Fullback®V can be cut with any thin blade knife, we recommend the EasyCut knife, available through your distributor. It features a long, thin segmented blade specifically for cutting Fullback®V.
